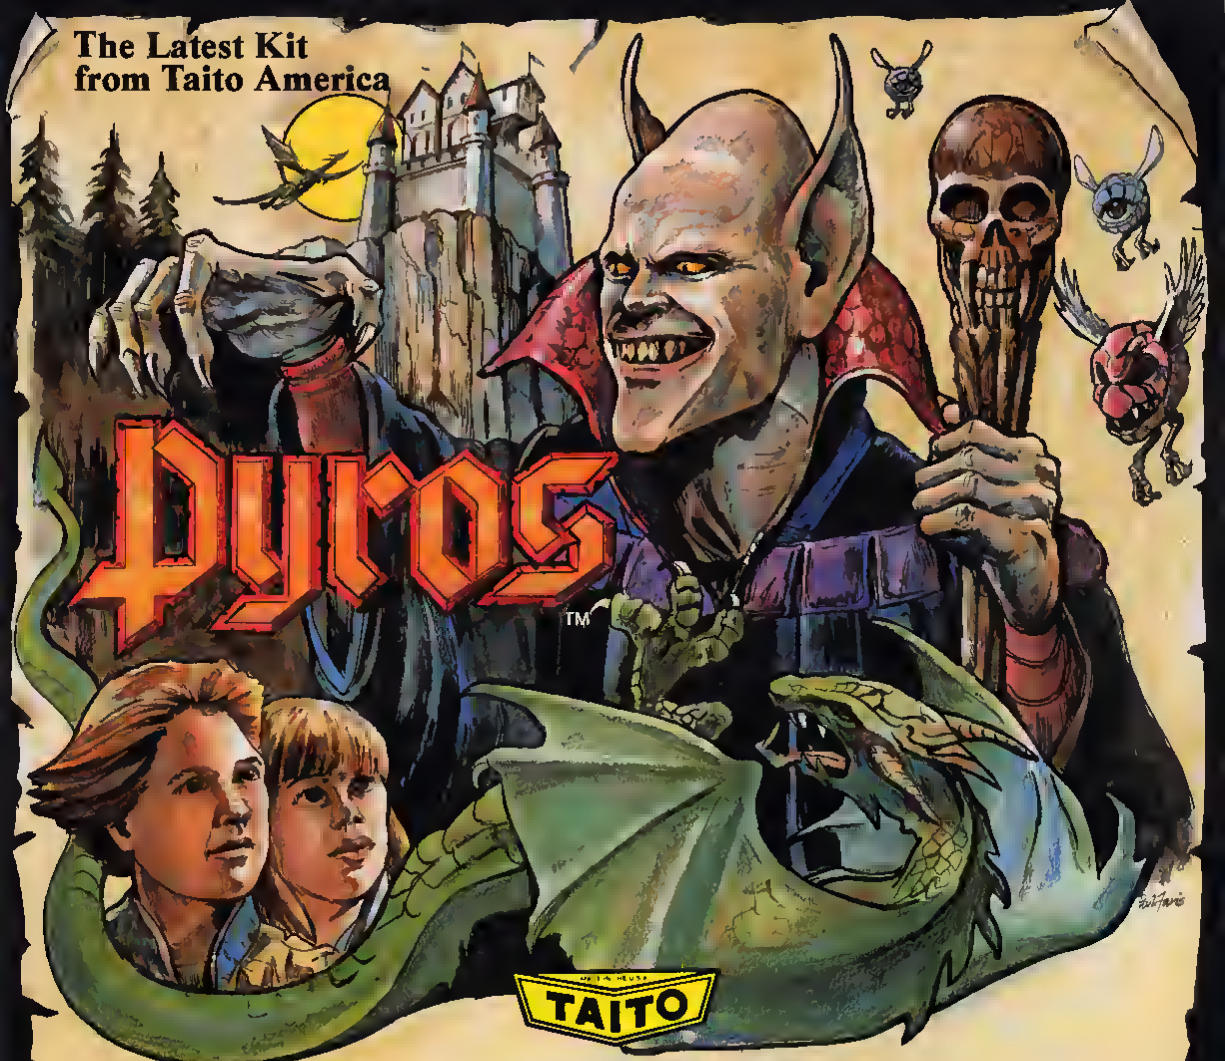
The Latest Kit from Taito America



Two youngsters, PYROS and ERIKA, unexpectedly strayed into a wonderland called Wardner's Forest. Upon entering the magical forest, the young girl was changed into a crystal ball by an evil warlock called "Wardner", the ruler of the forest, and brought to a secret place deep inside the woods.

The brave young PYROS armed with only a magic flame as a weapon sets out to rescue his female companion from the clutches of the evil Wardner and bring her safely home. Join him in his adventurous search through the magical forest to save his friend and to break Wardner's spell over the enchanted forest and all the inhabitants.

PYROS ™

How to Play:

Use the 8-way joystick to move away from the enemies and destroy them with your magic flame thrower (left button) or quickly jump (right button) away from their brutal attacks.

The magic flame thrower begins by shooting only a single flame but can be reinforced to a rapid fire flame thrower by killing the attackers and picking up yellow balls along the way.

Other reinforcement items can be collected by finding them hidden in the forest or by purchasing them from the merchants' shops located in various places throughout the forest.

Some enemies turn into gold coins when destroyed and the more gold collected along the way enables PYROS to purchase different weaponry from the shops.

There are 4 stages to clear before entering the castle basement of "Wardner's Room". Once inside, you must work your way up through the castle to find the evil Wardner and destroy him.

The continuation feature will help you clear the different stages and your weaponry remains in tact if you decide to continue the game.

The game ends when Wardner has been destroyed and ERIKA safely returns home.

If you enjoy adventure, you'll certainly enjoy "PYROS".
